2022

Key points Council

➤ Environmental ambition:

- Ring-fencing of eco-schemes
- Inclusion ANC payments in EAFRD ring-fencing
- Decreased baseline (conditionality), notably on biodiversity, nutrient management tool and animal legislation enforcement

➤ New Delivery Model

- Performance review in 2025 and 2027 only
- Result indicators under PR reduced and not covering all interventions and all expenditure
- CAP Plan approval

Key points Council

➤ Rural Development:

- Possibility to revise ANC definition
- Investments – less limitations regarding purchase of land; aid intensities; specifications / extension of exceptions for 100% support rate
- Large infrastructures for broadband, renewable energy and flood and coastal protection become eligible
- Specific support for the development of small farms added
- Cooperation – some precisions regarding LEADER
- Risk management voluntary

Key points Council

➤ Rural Networks

“When the networks referred to in Article 113 of this Regulation are established, they may carry out until 31 December 2025, in addition to the activities referred to in Articles 113 and 114 of this Regulation, the tasks referred to in Article 52(3), Article 53(3) and Article 54(3) of Regulation (EU) No 1305/2013 related to the implementation of the rural development programmes pursuant to Regulation (EU) No 1305/2013”

Translation

It enables the current networks to continue the tasks while setting up the new structures (CAP network(s)) and enables the network(s) to continue delivering the tasks related to the RDPs while waiting for the CSPs to be put in place

CAP reform proposals – European Parliament

COMAGRI report (April 2019)

key points

➤ Rural Development:

- Additional types of intervention (“women in rural areas” and “installation of digital technologies”)
- Incentive element for management commitments and ANC
- Overly detailed specifications of the types of interventions
- Voluntary character of risk management
- Including ANC (max. 40%) in the 30% EAFRD ring fencing for environment and climate

CAP reform proposals – European Parliament

COMAGRI report (April 2019)

key issues

- **New Delivery Model - CAP Plans, performance clearance and performance review**
 - Fear risk of renationalization – more EU-based requirements (compliance >< performance)
 - CAP Plans to include in annex “regional intervention programmes”
 - No strict annuality of planning (milestones and financial plan information could be multi-annual “where appropriate”) and of performance monitoring (performance reports and review meetings)

CAP reform proposals – European Parliament

COMENVI compromise amendments (April 2019)

Some key issues

- Reformulation of objectives with stronger stance on environmental ones
- Setting of targets at the level of impact indicators
- Conditionality extended to sectoral types of interventions
- AECMC: only "beneficial for environment" (quid of animal welfare?) and incentive element
- Investments: demonstrate no negative effect on environment ; negative list extended
- Ring-fencing EAFRD: 40% for environment (but including ANC)

THANK YOU!
