evaluation!

2021-2027

Working Package 4:

Appraisal of the planned monitoring, data collection and implementation arrangements of the CAP Strategic Plan

Working Package 3:

Appraisal of the IL and targets of the CAP Strategic Plan

Working Package 2:

Appraisal of the SWOT and needs assessment

Working Package 1:

Preparing the ex ante evaluation

Thematic Working Group no. 8

WORKING PACKAGE 1:

Assessment of RDP effects on achieving a balanced territorial development of rural economies and communities

MAY 2020

OCT 2020

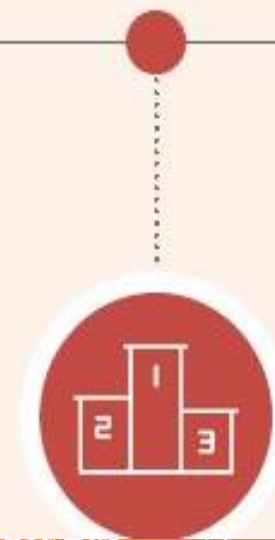

WORKING PACKAGE 2:

Assessment of RDP effects on ensuring the sustainable management of natural resources, and climate action

WORKING PACKAGE 3:

Assessment of RDP effects on fostering the competitiveness of agriculture

NOV 2020

Ex-post

Capacity Building in the Member States

Sept

'Improving evidence-based RDP evaluations in view of the ex-post'

Nov

Good Practice Workshop 13-14 May 2020

Where is the data?

- Agriculture probably the most “data-rich” sector (largest EU policy for nearly 60 years, strategic sector, prone to market instability, subject to policy interventions needing best data possible)
 - BUT under constant pressure to reduce scope (declining share of primary agriculture in GDP, below 2%)
 - IN SPITE of the progress of digitalisation
- Efforts to bring the most relevant data in one place (agri-food data portal, EU open data portal, future data spaces, etc)
- There is still a lot of data that is not yet shared or re-used:
 - Public: collected by administrations for a given purpose (e.g. most of IACS)
 - Private: generated at the farm, business level (e.g. records of farming activity, local registers, data generated by sensors in the farm/machinery, IoT, etc)

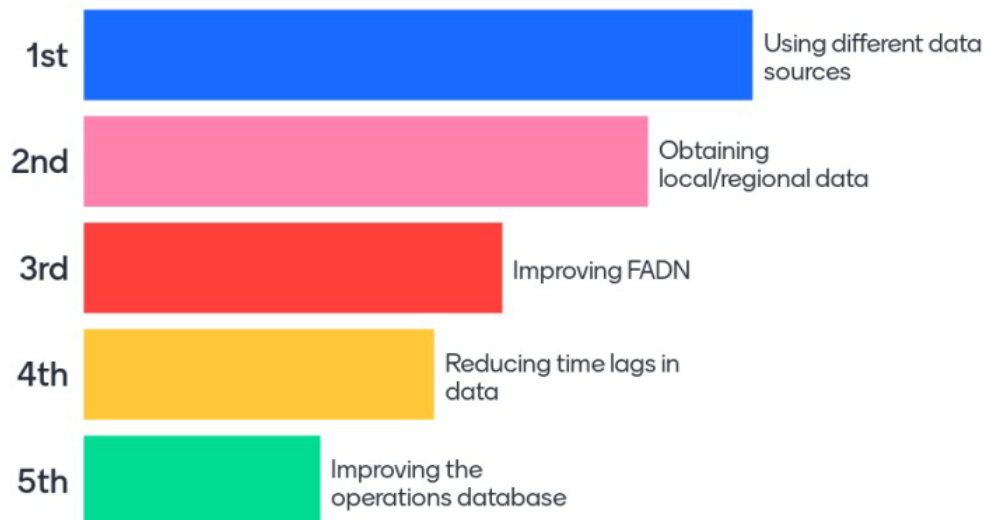

DATA-MANAGEMENT FOR THE ASSESSMENT OF RDP EFFECTS

Good Practice Workshop 13-14 May 2020

What are the most pressing data management issues related to the assessment of impact indicators for the ex post evaluation?

ASSESSING RDP EFFECTS ON WATER ABSTRACTION: A MIXED METHODS APPROACH FROM THE GREEK REGION OF THESSALY

FACTSHEET OF THE EUROPEAN EVALUATION HELPDESK FOR RURAL DEVELOPMENT - MARCH 2020

MANAGING THE EARTH'S MOST VITAL RESOURCE

Water is one of the most vital planet and an essential and necessary for production, however, under increasing climate change and other effects related water and other natural resources have become scarce. Therefore, the sustainable management of water resources is an essential step in preserving food production, but the vast majority of today's societies.

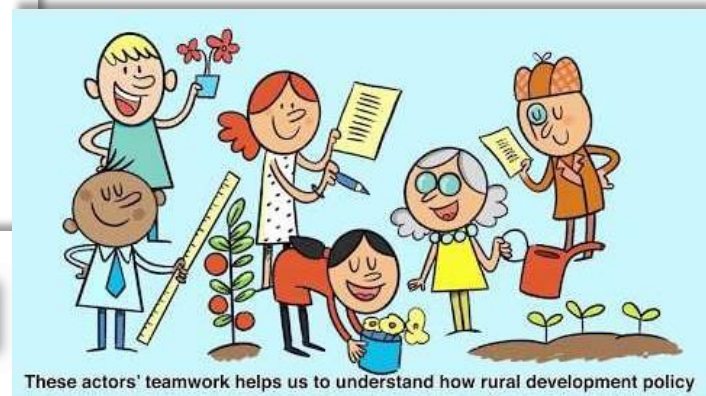

ASSESSING SYNERGIES IN THE SLOVAK RDP 2014-2020

FACTSHEET OF THE EUROPEAN EVALUATION HELPDESK FOR RURAL DEVELOPMENT - DECEMBER 2019

MAKING MEASURES WORK TOGETHER

In the programming period 2014-2020, focus has shifted to making sure that interventions are programmed in a way

These actors' teamwork helps us to understand how rural development policy
