

BASIC PRINCIPLE OF THE PILOT INITIATIVE

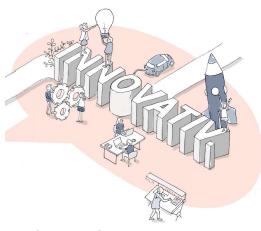

REGIONS

Different regional actors as a central factor for the success of innovation

DIGITALIZATION

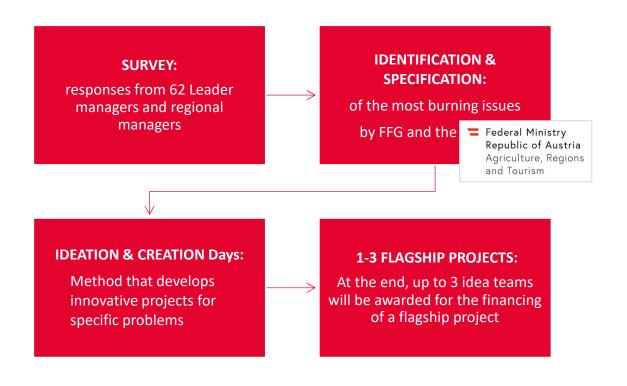

As a megatrend and innovation driver of the 21st century

INNOVATION

Innovation as a basic condition to secure prosperity and jobs in a highly developed economy

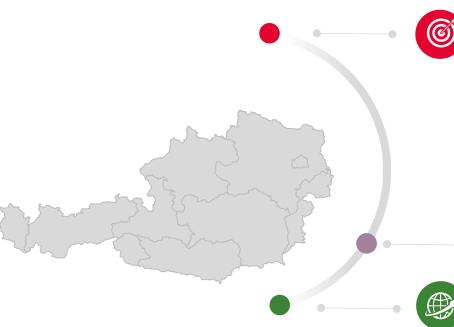

OVERVIEW OF THE PILOT INITIATIVE

3 IDENTIFIED CHALLENGES

- Use of digitalization and other innovative elements such as innovation networking management, innovation hubs, co-working spaces, for the expansion and networking of innovation ecosystems in regions
- · Preferably to strengthen local and urban centres, with the aim of promoting business- and knowledgerelated as well as creative jobs and employment for women

Public transport / accessibility

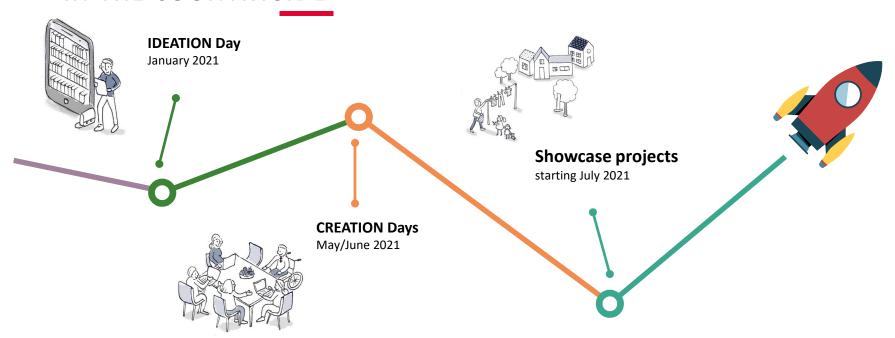

Regional added value

FIRST CHALLENGE: "WE DESIGN THE NEW WORKING AND MEETING SPACES IN THE COUNTRYSIDE"

AIMS OF THE CHALLENGE

Networking

Proactive networking with relevant actors from the Austrian innovation community

Methodical

Systematic process based on modern innovation and creative methods (ideation, design thinking)

Collaboration

Promotion of cross-regional cooperation through up to 3 cross-regional projects

Inclusive

Strengthening economic, knowledgerelated and creative jobs for women in regions

Showcase projects

Find and implement new solutions that can be used in several regions

Digital

Support and leverage of the innovative strength of the regions through digitization

TIMETABLE IDEATION DAY: "WE DESIGN THE NEW WORKING AND MEETING SPACES IN THE COUNTRYSIDE"

Selection of participants

The IDEATION Day was announced on the website and 4 questions had to be answered for participation. From these, 50 participants were selected in the form of an internal jury

Post-IDEATION Day

For those interested (independent of the Ideation Day) there was the possibility of further networking. There were 2 impulse talks (gender & vacancy activation) and information on financial support (25 participants)

Pre-IDEATION Day

For interested participants there was a pre-IDEATION day on Zoom (without registration) where the technical tools (Zoom & Slack) were explained (10 participants).

01/20

Pitching Session IDEATION Day

At the request of the participants, the opportunity was created to pitch their ideas in front of an audience. Five people made use of this opportunity. For each pitch there was a zoom survey (15 participants)

IDEATION Day

Half-day workshop (via Zoom) moderated by external moderator with breakout rooms based on defined questions and a Now-How-Wow Matrix (45 participants)

01/27

Submission of idea sheets

The ideas developed could be submitted in the form of idea sheets to the FFG by e-mail. These will be evaluated for the further process and up to 3 ideas (lighthouses) will be selected (26 submissions)

NEXT STEP: CREATION DAYS

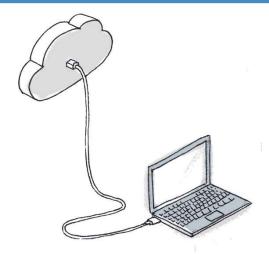

SELECTION OF 3 IDEAS

Through audience voting and internal jury

ONE WORKSHOP PER IDEA

With the respective submitters and selected persons

SUCCESS IN THE PROCESS SO FAR

- 1. Submission of 26 ideas
- 2. Networking of people worked well
- 3. Participants from many different regions of Austria
- 4. Many people remained active in the process until the end
- 5. Discussion on the topic was initiated
- 6. Numerous submissions from women

DIFFICULTIES IN THE PROCESS SO FAR

- 1. No technology developers in the process
- 2. No ideas on integration & people with disabilities
- 3. No freely accessible information at the beginning
- 4. Simplify questions
- 5. Selection of participants
- 6. Women have kept in the background
- 7. Filter out participants interested in funds only

FURTHER REVIEWS

GENDER ANALYSIS

Analysis of the different gender groups in the process, as some men have dominated in many formats (e.g. Slack, Pitching Day). Why did women stay in the background and men dominate Zoom events and the Slack channel, even though women's advancement was explicitly addressed and targeted?

COMMUNICATION CHANNEL ANALYSIS

Analysis of the communication in the Slack Channel, as some people were very actively represented here and as a result other people only wanted to exchange information in closed groups. What interventions would have been possible? Would another social media channel have been more suitable?

THANK YOU FOR YOUR ATTENTION!
