

Remunerating for climate action & the CAP

*Christine Falter, Policy Officer
Unit F1, DG Agriculture and Rural Development*

ENRD TG on Bioeconomy & Climate Action in rural areas (28.04.2020)

CAP post 2020

- *Climate change mitigation & adaptation, bioeconomy = specific CAP objectives*
- *Increased environmental & climate ambition*
- *Annex XI: link to EU legislation on climate, energy, environment*
- *More flexibility for MS to design intervention in line with specific needs*
- *EU level: set of broad interventions instead of detailed measures / sub-measures*
- *all relevant rural development support still available + ecoschemes under pillar 1 (new)*

CAP support remunerating climate action

- *land use, land management – crop production and livestock production, forestry*
- *resource efficiency (in agriculture & in rural economy)*
- *bio-economy value chains, income diversification*

CAP support

Land use, land management – crop production and livestock production, forestry

- interventions: AECM, ecoschemes, non-productive investments, forestry interventions
- Examples:
 - AECM (or ecoschemes) for grassland mgt., input mgt., soil mgt., crop mgt., landscape features, buffer strips etc.
 - non-productive investments: ecosystem restoration (wetland or peatland)
 - forestry: agro-forestry, forest conservation, afforestation

CAP support

Resource efficiency (in agriculture and rural economy)

- Examples:

- Input management, soil management (AECM, investments in precision farming, equipment, machinery)
- Investments in energy efficiency (farm machinery, livestock housing, rural businesses/ communities)

CAP support

Bio-economy value chains, income diversification

- Examples:

- Investments in renewable energy, bioenergy (on farm, rural businesses, rural communities)
- Quality schemes and labels
- Direct sales, short / local supply chains

Enabling the transition

CAP support for:

- *advice, knowledge transfer, training*
- *networking, innovation, cooperation*
 - EIP-AGRI operational groups
 - LEADER
